PROFILE

Results-driven Full Stack Developer with hands-on experience building and deploying real-world web applications across diverse industries. Proficient in the MERN stack, PHP, MySQL, and modern frontend technologies. Proven ability to deliver scalable, user-friendly solutions — from payment gateway integrations to real-time data dashboards. Currently contributing to live client projects at a fast-paced advertising agency.

EDUCATION

Abhinav College of Arts, Commerce & Science (**Mumbai University**) ***Maharashtra, India***
Bachelor of Science in Information Technology **(Bsc-IT)** ***[* 2022 – 2025]**

- Diploma in Software Programming **(Pride Computers)**
- Relevant coursework in [Relevant Subjects: - Computer Networks, Web development,etc]

SKILLS

- **Languages :-** Java, Python, HTML, CSS, PHP , Javascript, MERN Stack
- **Technical:-** SQL, Statistics, ETL, Data Visualization
- **Tools:-** Tableau, Power BI, Excel

CERTIFICATIONS

- Certificate for Web development from Skilled WorkForce Development
- Certificate for Java from Skilled WorkForce Development
- Certificate for PYTHON from Skilled WorkForce Development

EXPERIENCE

1) R5 ADVERTISING

FULL - STACK DEVELOPER :- **[04/12/25 – PRESENT]**

Worked on multiple real-world client projects including **Priyal Group, Furlords, NK Realty , Pixstox, and SPPL**. Developed responsive websites and dynamic web features using **HTML, CSS, JavaScript, PHP, and MySQL**, while also contributing to **MERN stack and Next.js based applications**. Implemented admin panels for lead management, integrated third-party services such as **CCAvenue payment gateway and Shiprocket**, and developed interactive components like stock market heatmaps for real-time data visualization. Collaborated with designers and backend teams to deliver scalable, user-friendly business websites and web applications.

PROJECTS

1) HOTEL_BOOKING_WEBSITE [15/04/25 – 15/05/25]

Developed a user-friendly hotel booking website using HTML, CSS, JavaScript, PHP, and MySQL, with Razorpay payment gateway and email verification for seamless room reservations.

Utilized HTML, CSS, JavaScript for front-end, PHP and MySQL for back-end, Razorpay API for payments, and PHPMailer for email verification, following MVC architecture.

1. Achieved 95% payment success rate with Razorpay integration for seamless bookings.
2. Reduced fake registrations by 80% through secure email verification.
3. Delivered a responsive, user-friendly platform with positive feedback on accessibility.

2) EVENT_MANAGEMENT_WEBSITE [01/01/25 – 22/02/25]

Developed a full-stack Event Management Website with separate admin and user dashboards for efficient event creation, approval, and management.

Implemented a budget allocation system, secure payment integration via Razorpay, and role-based authentication for users and admins.

Built a dynamic and responsive front end using React.js with real-time updates, and a robust back end using Node.js, Express.js, and MongoDB to handle event data, user registrations, and approvals efficiently. Integrated RESTful APIs for smooth communication between client and server, along with JWT authentication for enhanced security.

3) AI Code Generator Web Application [02/11/25 – 04-11-2025]

Developed an AI-powered web application using React.js integrated with the Google Gemini API for real-time code generation from natural-language prompts.

Implemented Monaco Editor for syntax-highlighted code display and live editing.

Built interactive UI using React Icons, React Select, and React Spinners for enhanced UX.

Added features like copy to clipboard, refresh generation, export code, and open in new tab.

Implemented toast notifications (React Toastify) for real-time user feedback and error handling.

4) *Gautam PharmaOps – Pharmaceutical Operations Dashboard* [05/12/25 – 07/12/25]

Developed a web-based dashboard to manage pharmaceutical inventory and hospital orders. The application allows users to add medicines, track stock levels, manage order statuses, and visualize data using charts. Built REST APIs using Node.js and Express with MySQL for data storage. Implemented real-time chart updates and expiry-risk evaluation logic. Deployed the frontend on Vercel and backend on Render with a cloud-hosted MySQL database.

Frontend: HTML, CSS, JavaScript, Chart.js
Backend: Node.js, Express.js
Database: MySQL (Railway – Cloud Database)
Deployment: Vercel (Frontend), Render (Backend) **Tools:** Git, GitHub, REST APIs
